DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement has been received and considered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-7 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1 line 1 it is unclear what the metes and bounds of "type" are.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 3683

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-7 rejected under 35 U.S.C. 103(a) as being unpatentable over Oka et al. '049 in view of Takayama et al. ('492).

Regarding claim 1 Oka et al. discloses in figures 1-4 a hydraulic pressure generating device having a constant pressure chamber A, a variable pressure chamber B, a fixed shell 1,2 an input shaft 30, a piston 4,7, a spring 13A,13B or 34, a power plate 10,11,14 and a control valve 17, as claimed.

Oka et al. Lacks a slide resistance imparting means provided somewhere between the piston and fixed shell.

Takayama et al. '492 discloses in column 8 that the sliding resistance of the piston cups 2a and 4b are used to improve pedal feel. See lines 48-57.

Such an idea is old and well known in the art and may be accomplished through a variety of means such as spring biased or elastomeric sealing elements or nylon or Teflon bushings between elements which slide relative to one another.

One having ordinary skill in the art at the time of the invention would have found it obvious to have provided the piston of Oka et al., and to have modified the area between elements 2, 4 so that it can accommodate a "slide resistance imparting means" to improve the pedal feel to the driver, as taught by '492.

Art Unit: 3683

Regarding claims 2-7 in view of the explanation above these limitations are simply and obvious alternative equivalent arrangement to that of Oka et al., as modified by Takayama et al.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
